TRANZ 420

With its integrated printer, slide-in memory cartridge and long-term battery backup, the TRANZ 420 transaction system doesn't compromise performance.

The TRANZ[®] 420 system makes it easy to expand existing applications or add new ones. The slide-in cartridge provides up to 256 Kbytes of additional random access memory (RAM). Giving you the power you need to handle larger applications or to add new functions to your existing ones. The system's printer gives you crisply printed two-part receipts. It also provides you with a complete audit trail report that you can compare with the electronic record for accurate balancing at the close of the business day.

What's more, the TRANZ 420 works where you need it. The built-in battery lets you process up to 200 transactions without AC power. That means you can take it with you anywhere in the world. With an adapter, it even runs on the power supplied by your car battery.

The TRANZ 420 supports a PIN pad or a bar code wand. So you can easily expand your capabilities. You can also add, update and create applications with minimal effort—using the VeriFone[®] programming language designed specially for transaction processing.

A versatile transaction system, the TRANZ 420 delivers low-cost credit card verification and check guarantee. In addition, it performs specialized business functions such as price lookup, negative file storage, draft capture and inventory control. And it's used in applications that help hospitals, pharmacies and government agencies determine a person's eligibility for benefits programs.

TRANZ 420

Features

- Accepts all major credit, debit and private-label cards
- Provides fast, accurate receipts and reports through its convenient integrated roll printer
- Gives you additional power to handle larger applications or to store more data files and transactions, through optional RAM Cartridges
- Comes with a built-in battery that allows the system to process up to 200 transactions without AC power
- Lets you add a PIN pad for debit transactions or a bar code wand for direct entry of encoded information
- Simplifies the creation and updating of application programs through a unique POS terminal control language
- Performs fast application downloads and file transfers
- Prompts you through each step of a typical transaction with an easy-to-read display
- Includes all the security and fraud control features required in bankcard environments

Specifications

Hardware

Memory	32 Kbytes EPROM and 32 Kbytes battery-backed RAM
Display	16-character, vacuum fluorescent display, including decimal point and comma
Card Reader	ABA track 2 magnetic card reader Track 1 reader available as an option
Memory Cartridge	Slide-in RAM cartridge for 256 Kbytes of additional memory
Printer	24-column dot matrix roll printer
Peripheral Ports	RS-232 serial communications port for direct connection to a personal computer, electronic cash register or slip printer TTL port for a PIN pad or a bar code wand

Communications

Modem	Standard modem with selectable options: Bell 103, Bell 212 and CCITT V.21/V.22
-------	---

Physical

Height	4.57in (116 mm)
Width	5.83 in (148 mm)
Depth	11.85 in (301 mm)
Shipping Weight (Approximate)	4.0 lbs (1.8 kg)

Environmental

Operating Temperature	0° to 40° C (32° to 104° F)
Operating Humidity	15% to 90%, non-condensing

Power

Voltage	95 to 130 VAC, 60 HZ ±1HZ 200 to 254 VAC, 50 HZ ±1HZ 6 VDC self-charging lead-acid batter Optional: 12 VDC automotive systems
